Lidded Hollow Form by
Heath Knuckles

The special geometry of our negative rake carbide enhance turning. They:

- Create smooth, continuous cuts, even in hard-to-turn materials.
- Are made especially for acrylic, resin, and super hard woods like mesquite or ironwood.
- Greatly reduce chipping and catches.
- Create a beautifully smooth finishing pass on all materials.
- Reduce sanding time.
- Make hollowing easier with smooth, controlled cuts.
